ABOUT US

CONSULTING

J&J connects students with senior practitioners from diverse industries, offering prestigious career advisory and access to a wide professional network.

J&J's Founders

- Years ago, we came to the UK with dreams of a better future. We pursued our degrees, landed jobs in different industries, and broke through many barriers to work our way up the career ladder. Now, most of us are either in senior positions at large corporations or professional institutions or have started our own businesses.
- Each of us has a unique story full of courage, challenges, setbacks, achievements, and, most importantly, people who inspired and helped us - our mentors. Over the years, we have acquired deep knowledge and connections in our respective areas.
- J&J was born from our passion to share our stories, experiences, knowledge, and connections with young people who are in a similar position to where we were 20 years ago. We aim to guide and support individuals in achieving their career goals in the UK.

Our Beliefs

Quality and Long-term Development

This one-stop approach helps students gain insights into different career paths, receive guidance on how to enter and excel in those fields, and build a robust network of contacts that can assist them in their professional endeavours.

By engaging with senior practitioners, students can benefit from their wealth of experience and knowledge, while practitioners can pass on their expertise and insights to the next generation of professionals. Our focus is always on the long-term development of individuals.

Our Missions

We are committed to:

- To provide high-quality, personalized career mentorships to individuals seeking to advance their careers by senior practitioners in the industry
- To establish strong partnerships with employers and industry leaders, creating pathways for career advancement and professional development
- To build a community of professionals who share knowledge and support one another as they navigate their careers
- To stay up-to-date with emerging trends and changes in the job market, and to provide timely and relevant advice to clients
- To promote diversity and inclusivity in the workplace, and to advocate for fair and equitable hiring practices

UK JOB SEARCH

CONSULTING

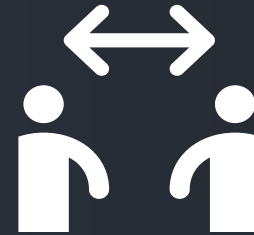

J&J will help you identify the barriers in the workplace and guide you through to find your best career path.

Difficulties Faced by International Graduates

Short degree programme

Most UK undergraduate programmes are only three years long. Students often feel short to multitask among academic work, job application and master's application, resulting in inadequate preparation for job applications.

Competitive internship

Competition for internships is fierce in the UK. Internship experience could greatly affect the chances of full-time employment, and many international students start to fall behind in this loop.

Student's background

Academic performance of international students are mostly impeccable; however, they tend to lack extracurricular activities and social experience that is highly valued by the UK companies.

Lack of local network

A big percentage of international students in the UK do not socialize with local people, resulting in a lack of local contacts and difficulties in accessing information and career opportunities.

Timeline of UK job search

First Year

Students are adapting to and exploring the new environment. While expanding one's social circle, students should also polish their CV, add in relevant project experience and refine interview and written test skills to prepare for the job search in the penultimate year.

Penultimate year

The most important time point in the job search process. Ideally, students gain their summer internship experience through the autumn recruitment process at the start of their penultimate year. Many UK companies will make offers of full-time employment to outstanding interns after graduation.

Final year

If students have not gained the appropriate internship experience in the penultimate year, they should continue polishing their CV and interview skills in the final year and prepare for an internship or full-time job application.

3

MENTORSHIP PROGRAMME

We tailor to the needs of each student and design bespoke development plans to support your career building.

J&L
CONSULTING

Introduction to J&J's core programmes

BASIC PLAN

For students who wish to have a deeper understanding of the industry, acquire a clear career development direction, and become proficient in job hunting skills

ADVANCED PLAN

For students who wish to plan long-term career development with a senior mentor in the industry, gain an in-depth understanding of industry trends, and enhance their competitiveness in all aspects.

ULTIMATE PLAN

For students who require more industry resources, networks and internship opportunities on top of the ADVANCED PLAN

Programme introduction

J&J has designed three core programmes aimed to help students improve their personal abilities, polish their job-hunting skills and excel in their chosen career path.

*All programmes have a three-year service period.
